GONZAGA,WELCHS ROBERT M.
BSIT - 3A

HUMAN INTERACTION 2
SIR. JOHNEROS PUYO

What did you learn about this activity ?

Creating my website portfolio was a valuable learning experience that helped me apply the skills I've gained throughout my IT studies. I strengthened my knowledge in HTML, CSS, and JavaScript, and learned how to make a responsive and user-friendly layout. I also improved my understanding of user interface and experience design, ensuring the site is both visually appealing and easy to navigate. This project allowed me to see the importance of clean code, mobile compatibility, and consistent design.

Beyond technical skills, building my portfolio taught me how to present myself professionally and reflect on my growth as a student and aspiring developer. I learned the value of showcasing my projects and experiences in a way that highlights both my abilities and passion for web development. Overall, this project gave me more confidence in my skills and motivated me to keep learning and improving.
